

Assignment for Frontend Developer Intern

Assignment: Develop a Dashboard Using React.js

Objective:

Implement the provided dashboard design using React.js. Ensure that the frontend matches the given image precisely.

Requirements:

1. Frontend Development:

- Use React.js to build the dashboard frontend.
- Ensure that the layout, components, and styling match the provided image 1:1.

2. Responsive Design:

- Make the dashboard responsive to different screen sizes and devices.
- Ensure that the layout adjusts appropriately for mobile and tablet devices.

3. Code Structure:

- Organize your code files and components in a structured and maintainable manner.
- Use best practices for React.js development, including state management and component reusability, if needed.

4. Documentation:

- Include comments in your code to explain complex logic or functionality.
- Provide a README file with instructions on how to run the project locally.

Submission:

All code contributions will be submitted as a Pull Request (PR) under your Full Name and Position (FirstName LastName Position) on the GitHub repository located at

https://github.com/koders-in/Employee-dashboard.git

Evaluation Criteria:

- Accuracy and fidelity of the frontend to the provided design.
- Responsiveness and usability of the dashboard across different devices.
- Quality of code structure, organization, and documentation.
- Adherence to best practices and conventions for React.js development.
- Completeness of the implementation, including all required components and features.
